Education

Bachelor of Science

2023 – 2028

Major in Computer Science; Minor in Data Science; Faculty of Science Co-op Program

University of Calgary, Calgary, AB

Skills

Languages: Python, SQL, R, Java, C++, C#, JavaScript, HTML, CSS

Software Development: React, Next.js, FastAPI, Git, Supabase, PostgreSQL, HISE

Data Science & Analytics: NumPy, Pandas, scikit-learn, XGBoost, TensorFlow, GeoPandas, Power BI, ArcGIS

Experience

Associate Programmer & Music Composer

Aug 2025 – Present

Glass Gecko Games

Hybrid

- Composed and implemented original music for *Scale the Depths*, a commercially successful game with **140,000+ copies sold**.
- Wrote **C# scripts in Unity** to track player progression, location, and gameplay state and dynamically trigger music transitions.
- Integrated and debugged adaptive audio systems in **Unity**, resolving event triggers, synchronization, timing, and playback issues.

Founder & Full-Stack Software Developer

Aug 2026 – Present

blank audio

Calgary, AB

- Develop audio software using **C++, JavaScript, and HISE**, implementing DSP algorithms, real-time audio features, and interfaces connected to audio-processing parameters.
- Built the company platform using **React, Vite, Supabase, and PostgreSQL**, including authentication, user accounts, database-backed access control, and protected downloads.
- Design interfaces in **Figma** and use **Git, OpenAI, and Claude** to support version control, debugging, refactoring, and feature development.

Leadership

Competition Director

Jun 2025 – Present

Data Science and Machine Learning Club

University of Calgary

- Lead university **data science and machine learning competitions**, coordinating datasets, technical resources, workshops, and participant workflows.
- Develop technical workshops using **Python, Pandas, NumPy, scikit-learn, TensorFlow, and Power BI** for machine learning and data visualization.
- Created **5+ hours of GIS tutorials** using **ArcGIS, QGIS, GeoPandas, and PostGIS** and evaluate platforms such as Databricks for competition use.

Projects

North American Fracturing Operations Intelligence Case Study

Mar 2026 – Apr 2026

Python, PostgreSQL, Power BI

- Analyzed **1M+ oil fracturing records** using **Python and Pandas** to evaluate operational performance across North America.
- Applied **K-means clustering, correlation analysis, and weighted performance scoring** to identify and quantify operating patterns.
- Used **PostgreSQL and GeoPandas** for large-scale and spatial analysis and built a **Power BI dashboard** communicating findings to oil regulators.

Calgary Property Price Prediction Platform

Oct 2025 – Dec 2025

Python, XGBoost, FastAPI, Next.js

- Cleaned and transformed **2024 City of Calgary residential assessment data** using Python and Pandas for predictive modelling.
- Trained an **XGBoost regression model** and used **GeoPandas** to analyze factors and geographic patterns associated with property values.
- Built a **FastAPI REST API and Next.js frontend** for submitting property information and returning model predictions.

Awards

Faculty of Science Dean's List

2025 – 2026

Faculty of Science

University of Calgary

- Recognized for outstanding academic achievement with a GPA of 3.60 or higher across a 2025/2026 academic year.

1st Place – DSMLC Final Competition x Urban Systems

Mar 2025

Data Science & Machine Learning Club

University of Calgary

- Analyzed Canadian small-business loan and claims data using **Python, R, and Power BI** to identify financing and growth trends.
- Presented data visualizations and evidence-based findings to **industry professionals, faculty, and students**.
