Education

University of Calgary

Bachelor of Science, Computer Science; Minor in Data Science

2023 – 2028

Calgary, AB

Skills

Languages: Python, SQL, R, Java, C++, C#, JavaScript

Data Science & ML: Pandas, NumPy, scikit-learn, XGBoost, TensorFlow, GeoPandas

Tools & Platforms: Power BI, PostgreSQL, ArcGIS, Git, Supabase

Software Development: React, Next.js, FastAPI, Vite, JUCE, HISE, Unity

Experience

Founder & Software Developer

blank audio

Aug 2026 – Present

Calgary, AB

- Develop audio software using **C++**, **JavaScript**, and **HISE**, implementing DSP algorithms, real-time audio processing, and interfaces connected to audio parameters.
- Built a full-stack distribution platform using **React**, **Vite**, **Supabase**, and **PostgreSQL**, implementing authentication, user accounts, access control, and protected software downloads.
- Collaborate with a small development team using **Git** for version control, code review, debugging, and feature development.

Junior Software Developer

Glass Gecko Games

Aug 2025 – Aug 2026

Hybrid

- Wrote **C# scripts in Unity** to track player progression, location, and gameplay state and dynamically trigger audio transitions.
- Integrated and debugged adaptive audio systems in Unity, resolving event triggers, synchronization, timing, and playback issues.
- Composed and implemented original music for *Scale the Depths*, a commercially released game with **140,000+ copies sold**.

Leadership

Competition Director

Data Science and Machine Learning Club

Jun 2025 – Present

University of Calgary

- Lead university data science and machine learning competitions, coordinating datasets, technical resources, workshops, and participant workflows.
- Develop technical workshops using **Python**, **Pandas**, **NumPy**, **scikit-learn**, **TensorFlow**, and **Power BI** for machine learning and data visualization.
- Created **5+ hours of GIS tutorials** using ArcGIS, QGIS, GeoPandas, and PostGIS and evaluate technical platforms for competition use.

Projects

North American Fracturing Operations Intelligence

Python, PostgreSQL, GeoPandas, Power BI

Mar 2026 – Apr 2026

- Analyzed **300k+ oil fracturing records** using Python and Pandas to evaluate operational performance across North America.
- Applied **K-means clustering**, **correlation analysis**, and **weighted performance scoring** to identify and quantify operating patterns.
- Used PostgreSQL and GeoPandas for large-scale and spatial analysis and built a **Power BI dashboard** to communicate findings.

Calgary Property Price Prediction Platform

Python, XGBoost, FastAPI, Next.js

Oct 2025 – Dec 2025

- Cleaned and transformed 2024 City of Calgary residential assessment data using Python and Pandas for predictive modelling.
- Trained an **XGBoost regression model** and used GeoPandas to analyze factors and geographic patterns associated with property values.
- Built a **FastAPI REST API** and **Next.js frontend** for submitting property information and returning model predictions.

Awards

Faculty of Science Dean's List

University of Calgary

2025 – 2026

Calgary, AB

1st Place – DSMLC Final Competition

Data Science & Machine Learning Club

Mar 2025

University of Calgary
